

## Output

- Over the last 2 years output of production industries has increased by around 1.5%, compared to 1.9% for the UK
- Over the last 2 years output of manufacturing industries has increased by around 3.5%, compared to 1.0% for the UK
- The latest figures may indicate a leveling off of the upward trend seen since mid-1999, although it is too early to tell if these is a short term effect
