Atal a gwrthdroi colli natur erbyn 2030 | Halting and reversing the loss of nature by 2030

1. Your views on the effectiveness of current policies / funds / statutory duties in halting and reversing the loss of nature by 2030.

(We would be grateful if you could keep your answer to around 500 words).

You want to halt and reverse the loss of nature,. YET, under your relentless march towards net zero. Your Government has allowed, nay, encouraged, just under 2 MILLION trees, yes, 2,000,000 trees, to be felled on NRW owned/managed land, to enable the building of large wind farms, which in turn ruin the landscape and skylines of the Welsh countryside. How many trees have you replanted to compensate for the 2,000,000 already felled ? Have the squirrels and woodpeckers been informed of this attack on their homes ?

Also, how many more trees are going to be felled with the current " dash for cash" river of wind farm planning applications landing on PEDW's desk almost on a daily basis. The flood of planning applications should be alarming you. That is if your Government actually cares.

2. Your views on the progress towards implementing the Biodiversity Deep Dive recommendations.

(We would be grateful if you could keep your answer to around 500 words).

No comment.

3. Your views on current arrangements for monitoring biodiversity.

(We would be grateful if you could keep your answer to around 500 words).

No comment.

4. Your views on new approaches needed to halt and reverse the loss of nature by 2030.

(We would be grateful if you could keep your answer to around 500 words).

No comment.

5. Do you have any other points you wish to raise within the scope of this inquiry?

(We would be grateful if you could keep your answer to around 500 words).

No comment.
