

Health and Social Care Committee
Human Transplantation (Wales) Bill
HT(Ind)54 - Courtney Brown

Dear Sir/Madam,

I would like you to take note of my concern regarding presumed organ transportation based on a system where people will need to actively opt out rather than opt in. I feel that this presumption could erode an individual's human rights or those of their family.

I am also concerned that this could prove to be a development that would make a body the property of the state. Where the body could be seen chiefly as a source of spare parts.

I hope you will give due consideration to my concerns.

Yours sincerely,

Courtney Brown (Mr)
