

DAVID FUTTER began as a stud farm manager before heading out on his own business venture which began buying and selling sports horses and has progressed organically into Britain's fastest growing National Hunt breeding operation situated on the border of Shropshire and Wales.

YORTON STUD comprises of stallions, mares and youngstock. Young horses are produced for both - the sales ring and the racetrack. In 2019, Yorton became the only stud farm with its own sale on site The Goffs Yorton Sale. It has played host to five premier sales, selling a handpicked selection of 2YOs and yearlings which has proven successful for high quality winners on the track.

INDUSTRY CHALLENGES & THE LOOK IN THE FUTURE:

- Classification of the industry.
- The need to open up the industry for a wider demographic.
- Recognising the difference between the National Hunt & Flat breeding industries & the ability to support both commercial & small breeders.
- Attracting employees to businesses located in remote areas.
- Brexit & its effects on movement of horses to Europe.
