

I am emailing you to complain about the recent Senedd Inquiry where NRW, Enovert and Wrexham Council squirmed and struggled throughout.

There were a lot of mistruths and collusion, bias and totally wrong assessment of the situation.

Community engagement is not existent.

Liaison Meetings are a closed shop, with inadequate on non-existing minutes.

The CEO Enovert claims rainfall does not effect the stench, when it is a scientific and well documented fact that increased leachate levels exacerbate H₂S levels.

Kind Regards
