

## **P-04-544 Ban the Shooting of Greenland White-fronted Geese**

### **Petition wording:**

We call on the National Assembly for Wales to urge the Welsh Government to reverse their decision not to ban the shooting of an endangered species, the Greenland White-fronted goose, meaning that Wales remains the only country on the flight path of this endangered species where they can still be legally shot and killed. Scientific evidence has shown that the species is extremely vulnerable to hunting pressures. In their consultation report, the Welsh Government also admit that failure to take appropriate steps to reduce as far as possible Greenland White-fronted geese adult mortality could be seen as a failure to meet conservation obligations. Unlike Scotland, Ireland, Iceland and Greenland there is no current ban on the shooting and killing of this endangered bird in Wales. A voluntary ban is in place on part of the Dyfi estuary in Wales but there is evidence that the geese also use other areas away from the estuary in mid and North Wales where no voluntary agreements are in place.

The population of these geese, as a whole, is declining and they have been of conservation concern since the late 1970s when sharp declines triggered protection from hunting on their wintering grounds. They receive heavy statutory protection. However, since the mid 1990s the population has again declined sharply. While WOS has acknowledged that long running voluntary bans on shooting are in place at some wetlands such as the Dyfi Estuary, it believes that nothing less than a statutory ban on shooting will ensure its protection. The society is concerned that any voluntary ban could be lifted at any time and that the current approach does not cover all the sites where this declining subspecies spends the winter.
