

**P-04-422 Fracking – Correspondence from the Petitioner to the Clerking Team, 13.02.15**

Hi Kayleigh,

I think the ground has shifted rather on this issue. However, the petition relates to onshore oil and gas, which includes coal bed methane and underground coal gasification. Perhaps the Committee would like to refocus its efforts on these forms of unconventional gas now that shale gas fracking has been subject to a moratorium?

Gareth
