

P-04-678 Infirm Supports. Correspondence – Petitioner to the Clerking Team – 14.03.2016

My request is that in being mindful of age infirmity and disabilities community funded vehicles should, to comply with the law, have the aids necessary to enable passengers that use community cars to travel with ease and dignity. Being at the same time aware that many who volunteer their services use their own vehicles, which do have the standard grab handles. A touch of irony is that Renault promotes this model as being suitable for the disabled etc. Thank you for giving this problem the attention which should increase awareness.
