

**P-05-825 Protect children's lungs from harmful pollution whilst at school,
Correspondence – Petitioner to Committee, 30.05.19**

The PHW response is a factual one that I don't disagree with at all. I was surprised by the HSE suggesting they have no involvement with air pollution, as I thought there might be a link for safety of the staff working at the schools.

We are interested in the pilot talked about by NRW in Cardiff and will be interested to see the results.

Kind regards,

Joseph Carter
